DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The abstract of the disclosure is objected to because at line 2 the phrase "the at least" is repeated. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: it is suggested that applicant shorten the title.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Geessink.

Geessink discloses a mold for forming blocks of cheese, the mold having a roughened surface to improve the rind formation of the cheese block. In regards to the use of stainless steel as the material of choice for the mold, it would have been obvious to one skilled in the art to use plastic, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In this case there appears to be no

Art Unit: 1761

advantage in using metal over plastic. In regards to the use of "micropeening" to provide a roughened surface, the method of forming is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

Allowable Subject Matter

Claims 10-20 are allowed.

Claims 5, 6, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Hain et al and Brockwell et al are cited for their disclosure of a roughened surface.
